Monitoring Requirements Not Met for Beaver Borough Municipal Authority

Our water system violated several drinking water standards over the past year. Even though these were not emergencies, as our customers, you have a right to know what happened and what we did to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During 2018 we missed the required sample deadline on one sample of DI (2 ethyl) Phthalate and therefore cannot be sure of the quality of our drinking water during that time.

What should I do?

There is nothing you need to do at this time.

The table below lists the contaminant(s) we did not properly test for during the last year, how often we are supposed to sample for DI (2 ethyl) Phthalate and how many samples we are supposed to take, how many samples we took, when samples should have been taken, and the date on which follow-up samples were (or will be) taken.

Contaminant	Required sampling frequency	Number of samples taken	When all samples should have been taken	When samples were or will be taken
DI (2 ethyl) Phthalate	Annual in 2 nd Qtr	1	by 6/30/18	8/15/18

What happened? What was done?

Sample deadlines for annual samples were not met, subsequent samples were taken as soon as possible.
